WHITE

Aurora	Exceptionally large white. Flower size and heavy stem are points of emphasis. Performs best in higher than average carnation temperatures, and with a narrow range of difference between day and night temperatures. An average to heavy producer. S-4
Electra	(NEW) Large informal white. Petals are deeply serrated. Exhibits the vigor, stretch, and production of White Sim with an improved stem for winter flowering. <u>Does not split.</u> P
Imp. White Sim	Large white sport of William Sim. Best under high winter light intensities to improve stem strength. S-4
Northland	Large formal white. Long considered to be both productive and reliable in many sections of the country. S-2
White Apollo	White sport of Apollo. Unequalled for year 'round productivity. A marked improvement over Olivette for flower size and stem strength during the winter months. More versatile than Apollo since it is not subject to fading. S-4
White Littlefield	Large white. Sport of Sidney Littlefield. S-2

SALMON PINK

Ambrosia	(NEW) A smooth and unvarying salmon pink. A shade lighter than Venus. Unusual stretch and rigid stemmed growth during the winter months. A durable flower for shipping. P
Apollo	A widely accepted salmon pink. Suitable in many areas of the country. Consistency in providing top quality flowers coupled with high productivity continue to lend favor to this variety. S-5
Athena	A lustrous salmon-pink slightly deeper than Venus and possessing a greater color clarity than Apollo under low light intensities. A reliable winter producer. Has vigor, stretch, and rigid stems. <u>Does not split.</u> Price Class. S-4
Salmon Sim	Peterson's light salmon colored Sim sport. Identical in growth characteristics to Pink Sim. S-3
Venus	A large, salmon-pink. Flawless color. Like Charm, possesses superb flower qualities coupled with a long, rigid stem. A noted exhibition variety. Performs most satisfactorily at Littlefield temperatures. S-3

LIGHT PINK

- Aphrodite A true light pink. An early producer with an early comeback. Best in high light intensity areas. S-2
- Lt. Pk. Littlefield Peterson's sport of Sidney Littlefield. Color of Virginia Hercules. S-2
- Pink Sim Peterson's flesh-pink Sim sport. S-3

DARK PINK

- Hermes A good dark pink with high temperature color-retention tolerance. Becomes a scarlet pink during the winter months. Ships and keeps well. Rarely splits. S-2
- Mentor Rich, rose-pink. Strong, rigid stems. Notable keeping and color retention properties throughout the year. S-2
- Sidney Littlefield Gleaming rose-pink. Noted for size and quality of flower it produces. Intolerant of high temperatures for color retention. S-2

SCARLET RED

- Cardinal Sim Large scarlet-red sport of William Sim. The most vigorous and productive of the red Sim sports. Less petal serration. Rarely splits. S-3
- Ember Sim A brilliant scarlet sport of William Sim. Flowers are larger and more heavily petalled. S-2
- Red Sim An improved William Sim. Greater vigor and productivity. S-3
- Red Apollo (NEW) An interesting dark salmon-red sport of Apollo. More heavily petalled and larger flower than its parent. Otherwise displays the same vigor and general growth habit of Apollo. P
- Siren A bright scarlet. Combines heavy production with a fast comeback and uniform cropping on stems of medium length. S-3
- Thor A vivid scarlet of medium size. Especially recommended for its dependable color retention during high temperature periods. Free and rapid growth. S-2

CRIMSON RED

Titan An intense crimson-red. Dependable and continuous growth during the winter months. Recognized for its better than average shipping and keeping qualities among the crimson group. S-1

YELLOW

Midas A dependable yellow. Best winter performance attained under high light intensities. Fast and reproductive. Tolerates closer spacing than Apollo or the Sim varieties. S-3

Imp. Miller's Yellow An improved color selection from Miller's Yellow. Formerly known as "Shirley Ann". Color is clear and intense. S-1

Harvest Moon An amber-gold sport of William Sim. Richly colored. S-1

NOVELTIES, VARIEGATED, etc.

Strawberry Sim Variegated red and pink Sim sport. An over-all narrow red pencilling diffused on a pink background. Background color markedly intensifies going into mid-winter conditions. A striking novelty. S-1

Dark Frosted Sim Same color pattern as Scarlet Sim but less intense. Two-thirds of each petal from its base, is diffused with dark pink pencillings. Petal margin blends to a light pink providing a frosted appearance. Very stable. Heavier stems than Scarlet Sim. S-1

Gaiety Variegated Sim. Flesh pink background overlaid with bright red pencil pattern. More stable than Copper's Variegated. S-1

Cooper's Variegated Light pink background with medium to large red pencil markings. One of the fastest and most reproductive of the Sim sports. S-1

Mamie Variegated Sim sport. White background overtone with thin red pencil striping. S-1

Scarlet Sim A tone on tone Sim sport. Color ranges from an intense scarlet at the base of each petal to a frosty white at the petal margins. Color becomes most intense under low temperature winter condition. S-1

Cassandra A lively yellow variegated. Pink pencilling. Rarely splits. Flower has excellent substance and is an outstanding keeper. S-2

Nectar Large orange-yellow variegated with broad scarlet striping. S-1
